

BUILDING CERTIFICATE

TO: Texas Windstorm Insurance Association:

I, the undersigned, do hereby certify the following:

This certificate applies to : (Indicate one) _____ The original structure
_____ The addition to original structure only
_____ Repairs only

- I am a registered professional engineer or architect, licensed to practice in the State of Texas, and from my personal inspection of this structure, I certify, that in my professional judgment, the item indicated above was built in compliance with the code checked below:
- I am the contractor that built the structure described below and do hereby certify the item indicated above was built in compliance with the code checked below:
- I am a building inspector employed by the city in which the structure described below is located and I do hereby certify that our records indicate the item indicated above was inspected and was built in compliance with the code checked below:

Described structure:

NUMBER	STREET	COUNTY	CITY
--------	--------	--------	------

- The (Southern) Standard Building code, as amended as of May 8, 1973. (Applicable to structures located inland of the intracoastal canal.)
- The Texas Windstorm Insurance Association Resistant construction code. (Applicable to structures located seaward of the intracoastal canal.)

I understand and intend that Texas Windstorm Insurance Association will rely upon this certification in determining whether to issue a policy of windstorm and hail insurance on the described structure.
