16.	Adjourn	

Estimated Total Length of Meeting

4 hours 25 minutes

# 1. Call to Order

#### ANTI-TRUST COMPLIANCE STATEMENT

The Board of Directors of TWIA is committed to strict compliance with federal and state anti-trust laws. The anti-trust laws are designed to promote free and open competition and to penalize any activities that unreasonably lessen business rivalry. Members of the Board of Directors of TWIA may freely discuss and agree upon agenda items relating to their responsibilities as Directors including such topics as coordinating efforts regarding state or federal legislation, discussion of TWIA policy on legislative issues and methods of legislative lobbying including grass-roots lobbying, public relations, testimony before legislative committees and meetings with state and federal legislators and regulators.

Because TWIA meetings bring together competitors, any unauthorized discussion of topics prohibited by the anti-trust laws such as agreements between competitors on prices and rates, agreements to boycott third parties or agreements to divide markets or even individual insureds could lead to an inference that such an illegal agreement among participants to the discussion was in fact reached. Accordingly, the following guidelines apply to any meeting or other activity conducted under the auspices of TWIA:

- Someone on the TWIA staff shall be present at all times during meetings of the TWIA Board of Directors or other official activities such as meetings of various TWIA committees unless such meetings are for the purpose of discussing personnel matters;
- At any such meetings or official activities, there shall be no discussion of voluntary market rates, prices, discounts or other terms and conditions of sale without the General Manager or the General Counsel being present;
- There shall be no discussion of the areas in which TWIA Board members and their respective member companies will compete for the products and services that they will offer; and
- There shall be no discussion of any agreement or understanding to boycott a third party or to deal with a third party only on certain terms.

Without the prior authorization of TWIA's General Manager or its General Counsel, there shall be no discussion of agreements to deal exclusively with certain parties, requirements that purchasers of particular products or services must purchase other products or services, standard-setting, certification, statistical reporting, or codes of ethics and other self-regulatory activities.

- Only TWIA staff shall keep minutes of TWIA meetings and will immediately terminate any discussion that may violate these guidelines.
- At TWIA meetings, TWIA company representatives should adhere to the written agenda and outside of TWIA meetings should scrupulously avoid discussion of any topic that might violate these guidelines.

Severe civil and criminal penalties, including fines and imprisonment, can result from violations of the anti-trust laws. Whenever in doubt about how to apply these guidelines, the directors, members, officers and guests of TWIA should consult its General Manager and General Counsel and proceed in a conservative manner in order to avoid any actual, or apparent, violation of antitrust guidelines.

2. Approve the Minutes

#### Minutes of the Texas Windstorm Insurance Association Board of Directors Meeting Teleconference/Web Conference

Moody Gardens Hotel Seven Hope Blvd. Galveston, TX

#### August 2, 2022

The Following Board Members were Present:

1.	Chandra Franklin Womack (Chair)	First Tier Coastal Representative

  48. Crystal Smith
  49. Belinda Strickland
  50. Roxanne Swierc
  51. Delma Tamez
  52. Aaron Taylor
  53. Jay Thompson
  54. Rep. Ed Thompson
  55. Angie Trejo
  56. Adrienne Truelove
  57. Steve Urbina
  58. Rosa Velasquez
  59. Stephanie Waterman
  60. Gaye White
  61. Glenda Witman
- 62. Peggy Zahler
- <u>Call to Order</u>: Ms. Franklin Womack called the meeting to order at 9:01 a.m. Board members were provided with a copy of the anti-trust statement and reminded of the prohibitions in the anti-trust statement by counsel. Mr. Perkins presented the required conflict-of-interest disclosures on behalf of each board member. Ms. Stafford reviewed the housekeeping items.
- <u>Approval of Minutes:</u> The minutes from the May 17, 2022 meeting were reviewed. Ms. Neblett moved to approve the minutes as presented. Mr. Garrett seconded the motion. The motion passed.
- 3. <u>TWIA Operational Highlights:</u> Mr. Polak reported the Association secured \$4.236 billion in total funding for the 2022 hurricane season and will avoid more than \$16 million in interest payments through 2024 as the result of early redemption of the 2014 bonds. The 2022 annual report card and catastrophe incident response plan was submitted to the legislature and insurance commissioner as required on June 1. Operating expenses remain below plan and net income is above plan through Q2 2022. All strategic initiatives are on track to be completed by their scheduled deadlines. Underwriting and claim service levels exceeded turnaround time and quality standards. Litigated claims and complaints remain below plan in Q2 2022.
- 4. <u>Public Comment:</u> Ms. Stafford reviewed the written public comment received ahead of the meeting. In person public comment was offered by Rep. Mayes Middleton, Rep. Todd Hunter, Rep. Ed Thompson, John LaRue, Tim Clower, Rep. Abel Herrero, Bryan Aycock, Deanna Heavilin, Ed Cantu, Greg Smith, Terrilyn Tarlton Shelton, Mike Rendon, Joel Romo, Gerhard Meinecke, Trace Finley, Garry Kaufman, Jim Wade, Marie Robb, Sally Bakko, Lee Loftis, Ben Molina, Belinda Strickland, Peggy Zahler and Travis McDavid.

- 5. Financial:
  - A. <u>Report of the Secretary/Treasurer</u>: Ms. Morrison reviewed the Treasurer's Report. Ms. Morrison moved to approve the report. Mr. Garrett seconded the motion. The motion passed.
  - B. <u>Financial Statement Review by Staff</u>: Direct written premiums for the six months ended June 30, 2022 totaled \$225.6 million, which was \$31.5 million (16.2%) above the \$194.1 million for the same period in 2021. Direct written premium was \$11.0 million (5.1%) higher than the budgeted \$214.5 million. Policies in force as of June 30, 2022 of 197,474 were 471 (0.2%) lower than the budgeted number of 197,945.

The TWIA 2022 – 2023 reinsurance program was successfully placed on June 1, 2022 and will remain in effect until May 31, 2023. The gross premium cost associated with the \$2.036 billion in coverage including CAT bond costs was \$122.8 million compared to a budgeted cost of \$102.1 million. Net cost of the reinsurance program after ceding commission was \$118.2 million. Reinsurance premiums ceded are recognized over the hurricane season beginning June 1 and ending on November 30 of each year.

Direct premiums earned through June 2022 totaled \$201.7 million compared to \$183.5 million for the prior year (an increase of \$18.3 million or 10.0%). Direct premium earned was \$3.7 million higher than the budget of \$198.0 million.

The one carrier (SafePoint) that signed up to participate in round six of depopulation selected approximately 32,000 policies for potential novation from TWIA. The agent review period closed on May 31, 2022 with a total of 79 policies still eligible for transfer. Owners of the remaining 79 policies will make their decision regarding potential transfer to SafePoint following the close of the hurricane season.

Direct losses and LAE incurred for the six months ended June 30, 2022 totaled \$32.2 million which was \$26.3 million below the budgeted amount. A relatively mild spring storm season was the primary cause for the better than budgeted results. This savings was slightly offset by adverse development associated with the 2021 Hurricane Nicholas. TWIA reported a YTD direct loss & LAE ratio of 16.0% versus a budgeted ratio of 29.6%. The ultimate loss and loss adjustment expense estimate for Hurricane Harvey continues to stand at \$1.67 billion.

Operating expenses for the six months ended June 30, 2022 of \$16.5 million were under budget by \$144,000 (0.9%). Notable expense items under budget included software and hardware (\$348,000), recruiting (\$108,000), postage (\$106,000) and rental and maintenance (\$140,000). These amounts were partially offset by over budget expenses in contractor and temporary help

(\$263,000) and IT consulting services (\$218,000). The year-to-date operating expense ratio of 8.2% was slightly below the budgeted 8.4%.

Year to date commission expense of \$36.0 million and premium taxes of \$4.2 million were over budget by \$1.7 million and \$196,000 respectively as direct written premium was higher than the budgeted amount. Gross investment income for the six months ended June 30, 2022 was \$459,000 which was \$356,000 higher than the budgeted amount of \$103,000. Interest rates on short term government backed securities remain at relatively low levels but have increased above 1% as the Federal Reserve raises interest rates to combat recent high levels of inflation. Interest expense on Class 1 bonds was \$2.1 million lower than the budgeted amount. The early redemption of the remaining \$177 million of Class 1 bonds was completed on May 9, 2022.

Net income for the six months ended June 30, 2022 was \$91.0 million or \$29.3 million (47.6%) above the budgeted income of \$61.7 million.

The surplus as of June 30, 2022 was \$11.4 million compared to the deficit of \$24.6 million as of December 31, 2021. The deficit improved due to the year-to-date net income of \$91.0 million. The improvement in the deficit was partially offset by \$53.1 million in statutory fund cost for the year-to-date CRTF accrual and an increase of \$1.9 million in non-admitted assets which consists primarily of prepaid expenses and capitalized software.

C. Investment of Trust Fund Balances (Texas Insurance Code Sec. 2210.4521): The TWIA Board of Directors last reviewed this provision as required in 2021 at their August meeting. This statutory provision requires the comptroller to invest excess CRTF funds in a less restrictive manner using a "prudent investor" standard and it requires the TWIA board to provide an annual notification to the comptroller regarding the excess funds/sufficient balance amount in the CRTF. The CRTF balance is approximately \$184.6M as of June 30, 2022. The CRTF is utilized for funding losses and expenses in excess of current year premiums and other revenue. Since there is a reasonable possibility that all of the funds in the CRTF may be required to be utilized in the event of a catastrophic event, TWIA staff believes that all the funds in the CRTF are necessary to meet the potential cash flow requirements of the fund in funding the payment of insured losses as provided by Section 2210.452(a). Thus, there are no excess funds in the CRTF at this time to be invested by the comptroller under the prudent investor standard set forth in Chapter 424 of the Government Code.

Ms. Neblett moved that based on Association staff analysis and recommendation the TWIA Board of Directors hereby determines that at this time the entire balance of the Catastrophe Reserve Trust Fund is required to be kept available to meet the cash flow requirements of the fund in funding the payment of insured losses as provided by Section 2210.452(a) of the Texas Insurance Code. Thus, staff is directed to notify the Texas Comptroller's office that the fund balance does not exceed the sufficient balance as defined in statute. Mr. Garrett seconded the motion. The motion passed unanimously.

- D. Selection of Auditors/Accountants for 2022 and Authorization of Non-Audit Services: Each year the Association retains an accounting firm to conduct an audit of the Association's financial statements as of and for the year ended December 31. Pursuant to an RFP process in 2021, Calhoun, Thomson + Matza (CTM) was selected to continue their role as the Association's independent auditor. Staff recommends to the board that the engagements be approved. Staff also requests authority to use CTM as needed over the coming year for assistance with certain tax related items and for non-audit services associated with the issuance of catastrophe bonds. Mr. Gerik moved the board of directors for the Association acting as the audit committee authorizes and directs that the firm of Calhoun, Thomson +Matza be engaged to conduct the upcoming annual audits of the Association's financial statements on the terms set forth in the Statutory and GASB engagement letters included in the board book. The staff of the Association is further authorized to engage Calhoun, Thomson + Matza to provide permitted tax related non-audit services and certain non-audit services in connection with the issuance of catastrophe bonds during the coming year as needed. Mr. Garrett seconded the motion. The motion passed unanimously.
- 6. <u>Agent Commission Study Update:</u> Ms. Armstrong reviewed the results of the agent commission study. Based on the limited availability of renewal data this early in the migration process and the need for agents to adapt their processes to the TWIA system and process changes, staff recommends performing a workflow analysis study with IIAT and exclusive agents beginning in April 2023, collecting 12 months of renewal data available in July 2023 and providing the results of those efforts to the board in a follow up report in August or December 2023. Mr. Gerik moved to adopt the staff recommendation but revisit at the December 2023 meeting. Ms. Neblett seconded the motion. Ms. Guard stated she would like a progress update between now and December 2023. Mr. Gerik amended his motion to also include a monthly progress update to be given to the board members. Ms. Neblett seconded the motion passed.
- 7. Actuarial:
  - A. <u>Reserve Adequacy</u>: The TWIA actuarial staff has completed a review of the Texas Windstorm Insurance Association loss and loss adjustment expense reserves as of June 30, 2022. The ultimate loss and loss adjustment expense estimate remains at \$1.67 billion, which is the same as the estimate as of March 31, 2022.

The actual ultimate costs of Hurricane Harvey may differ substantially from the selected \$1.67 billion. This variability arises from the assumptions made

regarding the adequacy of case reserves for open claims and the outcome of disputed claims. About 76 of the total 192 open claims are in some stage of litigation as of June 30, 2022. There remains a material risk of adverse development due to the large variability associated with outstanding disputed claims, including those claims subject to litigation. The actuarial team will continue to monitor current case reserve adequacy and litigation/disputes to ensure all outstanding obligations are properly reserved.

As of June 30, 2022, TWIA carried \$70.5 million in total gross loss and loss adjustment expense reserves with \$40,000 of the total gross ceded to carriers who have participated in the Association's Assumption Reinsurance Depopulation Program. The total gross loss and loss adjustment expense reserves include the reserves for Hurricane Ike, Harvey, Delta, Laura, Hanna, Nicholas and other outstanding claims. Collectability risk has been reviewed and found to be immaterial relative to total gross reserves. In the opinion of the senior actuary, the Association's reserves meet the requirements of the insurance laws of Texas, are consistent with reserves computed in accordance with accepted actuarial standards and principles and make a reasonable provision for all combined unpaid loss and loss expense obligations of the Association under the terms of its contracts and agreements.

- B. <u>Policy Count/Exposures:</u> Policy counts are up around five percent year over year.
- C. <u>Statutory Maximum Limits of Liability:</u> Section 2210.502(a) of the Texas Insurance Code states that the Texas Windstorm Insurance Association shall propose to the commissioner inflation adjustments to its maximum liability limits at a rate that reflects any change in the BOECKH index. TWIA actuarial staff has completed its review of Texas Windstorm Insurance Association adjustments to its maximum liability limits. These indicated limits are as follows:
  - Dwellings and individually owned townhouses:
    - o Current: \$1,773,000 Proposed: \$2,122,000 % Change: 19.7%
  - Manufactured home:
    - Current: \$96,600 Proposed: \$115,800 % Change: 19.9%
  - Contents of an apartment, condominium or townhouse:
    - Current: \$374,000 Proposed: \$443,000 % Change: 18.4%
  - Commercial structures and associated contents:
    - Current: \$4,424,000 Proposed: \$5,518,000 % Change: 24.7%

Ms. Neblett moved to accept the proposed changes. Mr. Gerik seconded the motion. The motion passed.

- D. <u>2022 Hurricane Season Funding</u>: Allen Cashin from Gallagher Re reviewed the hurricane season funding.
- E. <u>Review of TWIA Staff Adequacy Analysis and Actuarial & Underwriting</u> <u>Committee Recommendations:</u> Debbie King, Chair of the TWIA Actuarial and

Underwriting Committee, reviewed the outcome of their July 18<sup>th</sup> meeting. The committee recommended the board instruct staff to make the required annual rate filing with TDI seeking no change in rates.

F. <u>Required 2022 Annual Rate Filing</u>: Mr. Gerik moved that the board instruct staff to make the required annual rate filing with TDI seeking no change in rates. Ms. Neblett seconded the motion. A roll call vote was conducted.

Ron Walenta: No Karen Guard: Yes Corise Morrison: Yes Georgia Neblett: Yes Chandra Franklin Womack: Yes Mike Gerik: Yes Tim Garrett: Yes Peggy Gonzalez: Yes Tony Schrader: Yes

The motion passed.

Mr. Garrett moved that TWIA staff make a filing with TDI seeking approval for a 10% retrofit credit for windows that are installed meeting the specified windstorm resistance criteria. Ms. Neblett seconded the motion. The motion passed.

- Internal Audit & Status: Mr. Zaret reviewed the status of internal audit activities. Current audits include information security, business continuity of operations – information technology, reinsurance, model audit rule, continuity of operations plan – business operations and findings follow up. Upcoming audits include HR and payroll, plan of operation, claims and updating the risk assessment and audit plan.
- 9. <u>Underwriting Operational Review:</u> Underwriting continues to have consistent turnaround time on all transactions. The goal is to issue 90% of new business submissions, endorsements, renewals and cancellations within 10 days; this standard is being surpassed with over 98% of transactions processed within 10 days. Over 86% of applications/renewals were processed within one day.

Quality assurance results on underwriting decisions continue to exceed established goals. Telephone service response times and service quality scores for the quarter continue to meet expectations, with one exception. Results fell just below the standard of answering 80% of calls in under 20 seconds, coming in at 79.1%. This is due to the increase in customer inquiries following the launch of TWIA's updated policy administration system, combined with the annual seasonal swell of business and resource constraints. The department is operating below budget, largely due to managing headcount and more efficient use of virtual and aerial inspections.

Ms. Crass previously reported on one policy found to be noncompliant with the flood insurance requirement during the third quarter of 2021 and one additional policy found noncompliance during the fourth quarter of 2021. Since then, staff has worked with the respective agents to bring these policies into compliance.

Standard audits were completed for a sample of agencies doing business with TWIA in the first quarter of 2022 to verify compliance with the declination of coverage and flood insurance requirements. Ninety-five percent of agencies have now completed their responses. Staff are pursuing a response from the remaining agency and escalating issues as necessary. Of the agencies who have responded, all policies reviewed were compliant with the requirement for proof of declination of coverage. Three percent of the policies/properties selected for review required flood insurance. Of those, 67% meet the requirement and staff is working to bring the remaining policies into compliance. One agent has confirmed the flood policy was amended to bring coverage into compliance and staff is awaiting documentation of the same. All agents have an active property and casualty insurance license. Subsequent agency audits will be conducted following the recruitment and training of a new agent auditor.

#### 10. Claims:

- A. <u>Claims Operations</u>: Mr. Williams reported the average time that passes from first notice of loss to property inspection is currently at 2.7 days. Total cycle time from first notice of loss to payment is 5.4 days. TWIA claim volume for 2022 is 2,722.
- B. <u>Litigation Report</u>: Mr. Durden reported that two new suits were received in the second quarter and 35 were closed. In the second quarter, 82 new claims with letters of representation were received and 84 were closed. The majority of the suits were handled by the Baker Law Firm.

#### 11. TWIA Operations:

A. <u>IT Systems Update:</u> TWIA staff has returned to production support mode after the implementation of the Elevate systems upgrade and had its third monthly release on July 13<sup>th</sup>. All systems are stable as staff focuses on future enhancements based on empirical usage and defect fixes.

The infrastructure and operations team continues to support remote work with excellent quality. All technology support and projects are on track.

B. <u>Receive and Act on Recommendations from Legislative and External Affairs</u> <u>Committee Regarding Recommendations to Legislature and Biennial Report to</u> <u>Legislature:</u> Mr. Gerik reviewed the activities of the Legislative and External Affairs Committee. Mr. Garrett moved to approve the recommendations as presented. Mr. Gerik seconded the motion. The motion passed. Mr. Gerik moved to accept the public policy considerations. Ms. Neblett seconded the motion. The motion passed.

- C. <u>Communications Update:</u> Ms. Armstrong provided an update on hurricane preparedness and coastal outreach, the Elevate project, media relations and the Agent Advisory Group.
- D. <u>Update on RFPs for Professional Services</u>: TWIA staff has met with representatives from TDI several times regarding their recommendations for the issuance of RFPs. Their recommendations have been put into place and staff will now ensure that the process is in accordance with TDI's direction.
- E. <u>General Manager Search Update:</u> James Evan Cook is conducting the general manager candidate search. The position is posted on pertinent job boards. So far, there are 31 identified candidates and 24 of the 31 came from the online posting. Eleven are considered viable and have met the job description requirements. A solid pool of top candidates should be ready in the next few weeks. An interim meeting will be held to review the candidate resumes.

12. <u>Closed Session</u>: There was no closed session.

13. <u>Consideration of Issues Related to Matters Deliberated in Closed Session that May</u> <u>Require Action, if any, of the Board of Directors:</u> There was nothing to consider.

14. <u>Committees:</u> The general manager search committee will meet when there are candidates to consider.

15. Future Meetings:

- December 13, 2022 Omni Hotel Corpus Christi, TX
- February 14, 2023 Moody Gardens Hotel Galveston, TX

16. <u>Adjourn</u>: The meeting adjourned at 1:11 pm.

Prepared by: Amy Koehl Senior Project Administrator Approved by: Chandra Franklin Womack TWIA Chair

Approved by: Georgia Neblett TWIA Vice Chair

Minutes of the Texas Windstorm Insurance Association Board of Directors Meeting 5700 South MoPac Expressway Building A Austin, Texas 78749

August 31, 2022

 <u>Call to Order</u>: Chair Chandra Franklin Womack called the meeting to order at 1:33 pm. Board members were provided with a copy of the anti-trust statement and reminded of the prohibitions in the anti-trust statement by counsel and the required conflict of interest disclosures were made. Kristina Donley went over the housekeeping details for the meeting.

- 2. <u>Public Comment:</u> Ms. Donley reviewed the written public comment, which concerned escrow accounts for mortgagees who hold Weston policies. There was no verbal public comment.
- 3. <u>Weston Insurance Insolvency</u>: The board chair and staff explained that the meeting will primarily cover Weston but noted that UPC is also a troubled carrier. UPC has filed a plan for an orderly runoff that will be handled through normal processes during the runoff period. TWIA has received roughly 12,000 residential policies that information indicates are former Weston policyholders. TWIA staff has meet with TDI every morning for the last few weeks to update on the process. The primary approach has been to facilitate an orderly transition to TWIA of the former Weston policyholders, whose policies will be cancelled by the receivership court in early September, who want to make an application for coverage with TWIA. There was a need to address concerns and make sure there is flexibility in the application process and payment as there is a short runway to get coverage before the September 7 Weston policy cancellation date. Staff has established a process and procedure that provides a more flexible payment schedule, one of which allows for a zero-down payment for the first three months coverage is in force.

Ms. Crass said this was an informational meeting to update the board on the procedures in place so far. Ms. Crass reviewed the insolvency timeline. The premium plan is now in the agent portal and is only for Weston policyholders impacted by cancellation. An emergency rule was issued by TDI on August 23.

The Weston insolvency has affected approximately 30,000 Texas policyholders. It is assumed that many but not all would come to TWIA. Just over 2,000 TWIA policies were issued in August showing Weston as the declining carrier as of August 30.

4. <u>TWIA Coverage Issues Related to Weston Insolvency</u>: As additional applications come in, there are additional exposures. Mr. Murphy said exposures will grow with each policy. There could be scenarios where traditional reinsurance adjusts after hurricane season. There will be reinsurance in place for TWIA with respect to Weston policyholders that obtain insurance from TWIA, but the reinsurance premium may adjust upward to the extent the new Weston policies increase TWIA premium revenue coverage but it might cost a bit more. Ms. Morrison asked how the Weston

policyholders are being made aware of the process. There are internal plans to make agents aware of information to pass on to policyholders. A print add is running in two coastal news outlets. Weston policyholders have received more than one notice of the liquidation process from Weston and/or its receiver that provide information on claims. TDI has posted an FAQ on their page that overlaps with information TWIA has provided. Ms. Morrison asked how TWIA is resourced to handle this influx. Ms. Crass said there is a dedicated underwriting work group to address Weston. This work is being handled by the internal agent services group and the external call center. There is a possibility to bring on some contractors if needed. Agents are encouraged to tell customers to secure coverage sooner rather than later.

Ms. Crass said she would fold all the pertinent information into a weekly update. Mr. Gerik asked what the policy counts are on UPC for potential runoff to TWIA. Ms. Crass said staff is still in the process of determining that number.

5. <u>Adjourn:</u> The meeting was adjourned at 2:27 pm.

- <u>Call to Order</u>: Chair Chandra Franklin Womack called the meeting to order at 10:02 am. Board members were provided with a copy of the anti-trust statement and reminded of the prohibitions in the anti-trust statement by counsel and the required conflict of interest disclosures were made. Kristina Donley went over the housekeeping details for the meeting.
- 2. <u>Public Comment:</u> Ms. Donley summarized the written public comment. It concerned the desire for simplified installation requirements for windows and doors and mentions the affordability of wind and flood insurance. There was no verbal public comment.
- 3. <u>Review of 2023 TWIA Budget</u>: Mr. Harbour reviewed several key assumptions including no rate change, hurricanes not being included in the budget, depopulation not being factored in and an increase in premiums due to Florida carrier insolvencies. He projected a hard market for reinsurance in 2023. Direct written premium for 2023 is projected to be \$560,178,700.

Proposed headcount for 2023 is 255 with 235 as full-time employees and 20 contractors. A decrease in medical expenses is primarily attributed to a reduction in the negotiated rate by 10%. An increase in dental expense budget is due to higher estimated percentage of participation in 2023 vs 2022 at 99% vs 95%.

Ms. Neblett asked what the impact of Hurricane Harvey would be for 2023. Mr. Murphy said he didn't recall there being a huge shift in exposures after Harvey. Mr. Walenta asked about Aon's fee for modeling services. Mr. Murphy said he thought the \$600,000 fee was presented by Aon as renewable each year. Mr. Harbour said he would revisit the Aon contracts and determine the next steps to address their fee. Ms. Franklin-Womack said while the model hasn't changed, the volume will increase with the Weston policyholders. She would like to reach out to Aon to see if there will be a change in fees for 2023.

4. Adjourn: The meeting was adjourned at 11:41 am.

#### Texas Windstorm Insurance Association Management's Discussion and Analysis of Financial Results for the Nine Months Ended September 30, 2022

#### **Direct Written Premium:**

- Direct written premiums for the nine months ended September 30, 2022 totaled \$410.3 million, which was \$99.3 million (31.9%) above the \$311.1 million for the same period in 2021. Direct written premium was \$69.0 million (20.2%) higher than the budgeted \$341.4 million.
- Policies in force as of September 30, 2022 of 219,219 were 19,212 (9.6%) higher than the budgeted number of 200,007. The growth in policy count is primarily attributable to new policies that migrated to TWIA after the insolvency of Florida based carrier Weston.

#### **Reinsurance Costs**

The TWIA 2022-2023 reinsurance program was successfully placed effective June 1, 2022 and will
remain in effect until May 31, 2023. The gross ceded premium associated with the \$2.036 billion
in coverage consisting of traditional reinsurance and Catastrophe Bonds was increased in
September to recognize the higher exposures associated with the increased policy count from
Weston and recent growth trends. The new estimated ceded premiums (reinsurance cost) for
2022 total \$131.4 million compared to a budgeted amount of \$102.1 million. The net cost of the
reinsurance program after ceding commission was \$125.8 million. The ceded premium for the
traditional reinsurance is adjusted to account for increases or decreases in the Total Insurable
Value ("TIV") of the subject properties. Reinsurance premiums ceded are recognized over the
hurricane season beginning June 1 and ending on November 30 of each year.

#### **Direct Premiums Earned:**

- Direct premiums earned through September 2022 totaled \$315.8 million compared to \$279.9 million for the prior year (an increase of \$35.9 million or 12.8%).
- Direct premium earned was \$12.5 million higher than the budget of \$303.3 million.

#### **Depopulation Program:**

• The one carrier (SafePoint) that signed up to participate in round 6 of depopulation selected approximately 32,000 policies for potential novation from TWIA. The agents review period closed on May 31, 2022 with a total of 79 policies still eligible for transfer. Owners of the remaining 79 policies will make their decision regarding potential transfer to SafePoint following the close of hurricane season.

#### Loss and Loss Adjustment Expense Incurred:

- Direct losses and LAE incurred for the nine months ended September 30, 2022 totaled \$35.7 million which was \$28.1 million below the budgeted amount. A relatively mild spring storm season coupled with no hurricane activity was the primary cause for the better than budgeted results. This savings was slightly offset by adverse development associated with the 2021 Hurricane Nicholas.
- TWIA reported a YTD direct loss & LAE ratio of 11.3% versus a budgeted ratio of 21.0%.
- The ultimate loss and loss adjustment expense estimate for Hurricane Harvey was reduced by \$10 million to \$1.66 billion after actuarial analysis of inputs from claim and legal experts

6A2. Management Discussion and Analysis

#### **Operating Expenses:**

- Operating expenses for the nine months ended September 30, 2022 of \$24.9 million were under budget by \$430,000 (1.7%).
- Notable expense items under budget included software and hardware (\$493,000), salaries & wages (\$180,000), recruiting (\$63,000), and rental and maintenance (\$364,000). These amounts were partially offset by over budget expenses in contractor and temporary help (\$146,000), IT consulting services (\$147,000), Professional Services (\$380,000), and Other Expenses (216,000).
- The year-to date operating expense ratio of 7.9% was slightly below the budgeted 8.3%.

#### Commission Expense and Premium Taxes:

• Year-to-date Commission expense of \$65.6 million and Premium taxes of \$7.6 million were over budget by \$11.0 million and \$1.3 million respectively as Direct Written premium was higher than the budgeted amount.

#### Other Income (Expense):

- Gross investment income for the nine months ended September 30, 2022 was \$1.6 million which was \$1.4 million higher than the budgeted amount of \$160,000. Interest rates on the Association's investments in Money Market Mutual Funds have increased recently to slightly above 2% as the Federal Reserve raises interest rates to combat the current high levels of inflation.
- Interest expense on Class 1 bonds was \$4.6 million lower than the budgeted amount. The early redemption of the remaining \$177 million of Class 1 bonds was completed on May 9, 2022.

#### Net Income

• Net income for the nine months ended September 30, 2022 was \$94.4 million or \$18.3 million (24.0%) above the budgeted income of \$76.2 million.

#### Surplus/(Deficit):

The <u>surplus</u> as of September 30, 2022 was \$2.5 million compared to the deficit of \$24.6 million as
of December 31, 2021. The deficit improved due to the year-to-date net income of \$94.4 million.
The improvement in the deficit was partially offset by \$66.0 million in statutory fund cost for the
year-to-date CRTF accrual and an increase of \$1.4 million in non-admitted assets which consists
primarily of prepaid expenses and capitalized software.

# 7. Actuarial 7A. Reserve Adequacy

#### **MEMORANDUM**

DATE:	November 17, 2022
TO:	James C. Murphy, FCAS, MAAA Chief Actuary   Vice President, Enterprise Analytics
FROM:	Xiuyu Li, ACAS, MAAA Senior Actuary   Manager, Actuarial Analysis
RE:	Reserve Adequacy as of September 30, 2022

The TWIA actuarial staff has completed a review of Texas Windstorm Insurance Association loss and loss adjustment expense reserves as of September 30, 2022.

The ultimate loss and loss adjustment expense estimate for Hurricane Harvey has been reviewed based on information available to me as of September 30, 2022. Consistent favorable loss and expense development has been observed since first quarter of 2022, the ultimate loss and loss adjustment expense estimate is adjusted down by \$10M to \$1.66B after careful consideration of inputs from claim and legal experts.

The actual ultimate costs of Hurricane Harvey may differ substantially from the selected \$1.66B. This variability arises from the assumptions we made regarding the adequacy of case reserves for open claims and the outcome of disputed claims. The Actuarial team will continue to monitor current case reserve adequacy and litigation/disputes to ensure all outstanding obligations are properly reserved.

As of September 30, 2022, TWIA carried \$77.6 million in total gross loss and loss adjustment expense reserves with \$41K of the total gross ceded to carriers who have participated in the Association's Assumption Reinsurance Depopulation Program. The total gross loss and loss adjustment expense reserves include the reserves for Hurricane Ike, Harvey, Delta, Laura, Hanna, Nicholas, and other outstanding claims. Collectability risk has been reviewed and found to be immaterial relative to total gross reserves.

In my opinion, the Association's reserves met the requirements of the insurance laws of Texas, were consistent with reserves computed in accordance with accepted actuarial standards and principles, and made a reasonable provision for all combined unpaid loss and loss expense obligations of the Association under the terms of its contracts and agreements. While there remains a material risk of adverse development, reserves continue to make a reasonable provision for unpaid loss and loss adjustment expenses.

The complete actuarial analysis is available on request.

7C. Status of Filings

### **MEMORANDUM**

DATE:	November 21, 2022
TO:	David Durden General Manager
FROM:	James C. Murphy, FCAS, MAAA Chief Actuary   Vice President, Enterprise Analytics
RE:	Status of Filings

The TWIA Board of Directors directed staff to make several filings at its August 2, 2022 meeting.

TWIA made its annual rate filing on August 5 for no change in TWIA rates. Because this filing was not for an increase, no specific approval from TDI was required.

TWIA also filed proposed increases to its maximum statutory limits on August 5. On September 2, TDI issued an order initially modifying the filing to only approve an increase in the statutory limit for manufactured homes while keeping all other limits at their current amounts. After a hearing held on September 27, TDI issued a final order on October 3 setting the maximum limits for 2023 as follows:

	Current 2022	Approved 2023	% Change
Dwellings and individually owned townhouses	\$1,773,000	\$1,773,000	0%
Manufactured Home	\$96,600	\$115,800	19.9%
Contents of an apartment, condominium, or townhouse	\$374,000	\$374,000	0%
Commercial structures and associated contents	\$4,424,000	\$4,424,000	0%

The Commissioner's Order is attached for reference.

TWIA is in the process of implementing the systems changes required to expand eligibility for retrofit credits to structures that have replaced all glazed openings (windows). All filings and required changes are expected to be complete in December 2022.

JM

Commissioner's Order TWIA Maximum Liability Limits Docket No. 2835 Page 1 of 5

No. 2022-7541

## Official Order of the Texas Commissioner of Insurance

## Date: 10/03/2022

## Subject Considered:

Order on Texas Windstorm Insurance Association Policy Maximum Liability Limits Petition Docket No. 2835

## General remarks and official action taken:

The Texas Windstorm Insurance Association (TWIA) proposed adjustments to its maximum liability limits for policies delivered, issued for delivery, or renewed on or after January 1, 2023. This order modifies TWIA's filing.

## Background

Insurance Code Section 2210.502 requires that TWIA's board of directors propose inflation adjustments to TWIA's maximum liability limits not later than September 30 of each year. TWIA's board voted to propose adjustments to the maximum liability limits on August 2, 2022. Section 2210.503 requires that TWIA file the proposed maximum liability limits within 10 days of the board's proposal, which TWIA did on August 5, 2022.

Under Insurance Code Section 2210.501, the Commissioner must approve, disapprove, or modify TWIA's filing not later than 30 days after the Texas Department of Insurance (TDI) receives the filing or the filing is deemed approved. The Commissioner's authority under Insurance Code Section 2210.501 was delegated to the Deputy Commissioner for the Property and Casualty Division. *See* Commissioner's Order No. 2022-7476. On September 2, 2022, TWIA's filing was modified by Commissioner's Order No. 2022-7477.

## 2022-7541

Commissioner's Order TWIA Maximum Liability Limits Docket No. 2835 Page 2 of 5

Insurance Code Section 2210.504 provides that if TWIA's filing is disapproved or modified under Insurance Code Section 2210.501, then the Commissioner must again, after notice and hearing, either approve, disapprove, or modify the filing not later than 30 days after the initial disapproval or modification.

The Commissioner adopts the following findings of fact and conclusions of law:

## Findings of Fact

- 1. TDI received TWIA's annual filing to propose adjustments to its maximum liability limits on August 5, 2022. The filing was assigned Petition Nos. P0822-14 (residential) and P-0822-15 (commercial).
- 2. TWIA proposed the following adjustments to the maximum liability limits:
  - (a) An increase of 19.7%, from \$1,773,000 to \$2,122,000, for residential dwellings and individually owned townhouses and their contents.
  - (b) An increase of 18.5%, from \$374,000 to \$443,000, for the contents of apartments, condominiums, or townhouses.
  - (c) An increase of 24.7%, from \$4,424,000 to \$5,518,000, for commercial and governmental structures and their contents.
  - (d) An increase of 19.9%, from \$96,600 to \$115,800, for manufactured homes.
- 3. If the past increases for residential dwellings and individually owned townhouses and their contents had tracked the BOECKH Index since 1997, the maximum liability limit in 2022 would be \$877,000.
- 4. If the past increases for the contents of apartments, condominiums, or townhouses had tracked the BOECKH Index since 1997, the maximum liability limit in 2022 would be \$311,000.
- 5. If the past increases for commercial and governmental structures and their contents had tracked the BOECKH Index since 1997, the maximum liability limit in 2022 would be \$3,913,000.

## **2022-7541** Commissioner's Order TWIA Maximum Liability Limits Docket No. 2835

Page 3 of 5

6. If changes to the BOECKH Index after 1997 were applied to TWIA's current limit for manufactured homes, the result would be a maximum liability limit of \$211,400.

- 7. The maximum limit of liability for manufactured homes remained at \$84,000 from 1994 until January 1, 2022. In 2021, the Commissioner increased the manufactured home maximum limit of liability from \$84,000 to \$96,600, effective January 1, 2022.
- 8. Under Insurance Code Section 2210.502(d), the maximum liability limit applicable for governmental buildings is indexed the same as the maximum liability limit for commercial buildings.
- 9. According to the filing, 152 residential dwelling risks, 70 contents risks, 22 manufactured homes, and 328 commercial or governmental risks are at the maximum limit. This is approximately 0.11% of TWIA's residential risks, 2.4% of TWIA's manufactured homes, and 2.5% of TWIA's commercial and governmental risks in force as of June 30, 2022.
- 10. The cumulative adjustments to the maximum liability limits for residential dwellings, the contents of apartments, and commercial buildings have exceeded the increases in the weighted average BOECKH Index factors.
- 11. Commissioner's Order No. 2022-7477, issued September 2, 2022, modified TWIA's filing, approving the increase in the maximum liability for manufactured homes and disapproving the increases for dwellings and individually owned townhouses and their contents; contents of an apartment, condominium, or townhouse; and commercial and governmental structures and their contents.
- 12. On September 14, 2022, TDI posted on its website notice of a public hearing to be held at 2:00 p.m. on September 27, 2022, regarding TWIA's filing. Notice of the hearing was also published in the *Texas Register* on September 23, 2022. Both notices specified that written comments would be accepted until 5:00 p.m., central time, on September 27, 2022.
- 13. TDI held a hearing on September 27, 2022, during which TDI staff testified. Neither TWIA staff nor any members of the public testified. TDI did not receive any written comments.

Commissioner's Order TWIA Maximum Liability Limits Docket No. 2835 Page 4 of 5

## **Conclusions of Law**

- 1. The Commissioner has jurisdiction over this matter under Insurance Code Section 2210.504.
- 2. Insurance Code Section 2210.502 requires that TWIA file proposed inflation adjustments to TWIA's maximum liability limits.
- 3. Insurance Code Section 2210.501 requires the Commissioner to approve, disapprove, or modify TWIA's filing within 30 days after TDI receives the filing, or the filing is deemed approved.
- 4. Because TWIA's filing was initially modified, Insurance Code Section 2210.504 requires the Commissioner, after notice and hearing, to either approve, disapprove, or modify the filing not later than 30 days after the initial modification.

## Order

It is ordered that TWIA's filing with proposed increases to its current maximum liability limits is modified, as provided in Commissioner's Order No. 2022-7477.

TWIA's proposed increases to its current maximum liability limits for windstorm and hail insurance policies for dwellings and individually owned townhouses and their contents; contents of an apartment, condominium, or townhouse; and commercial and governmental structures and their contents, delivered, issued for delivery, or renewed on or after January 1, 2023, are disapproved.

TWIA's proposed increase to its current maximum liability limits for windstorm and hail insurance policies for manufactured homes delivered, issued for delivery, or renewed on or after January 1, 2023, is approved.

# 7D. 2023 Reinsurance Capacity, Pricing & Timing Issues

#### MEMORANDUM

DATE:	November 28, 2022
TO:	David Durden General Manager
FROM:	James C. Murphy, FCAS, MAAA Chief Actuary   Vice President, Enterprise Analytics
RE:	2023 Reinsurance Program

Staff has been working closely with TWIA's reinsurance broker, Gallagher Re, and their securities / catastrophe bond affiliate in preparation for the upcoming 2023 reinsurance placement. We have asked Gallagher to present information at the December 13, 2022 TWIA Board meeting regarding reinsurance market conditions, the associated impact on price and capacity, and additional reinsurance options such as parametric and industry loss-weighted coverage.

Given the hardening market conditions, Gallagher is recommending that the reinsurance planning and purchasing process begin as soon as possible. To that end, they recommend the TWIA board meet to set the 1:100 probable maximum loss amount in advance of its regular February meeting and authorize commencement of the reinsurance placement process at the December 13 meeting, at least in terms of a catastrophe bond transaction to replace the expiring 2020 Alamo Re bonds a few months early.

We have drafted the following resolution to assist the Board in the event they agree with the recommendations presented:

Resolved, that TWIA staff is authorized and directed to engage Gallagher securities and others as recommended by the broker to begin the process of placement of the June 1, 2023 - May 31, 2024 reinsurance program and to work with the Board members to set an interim Board meeting in January to further move the process along by selecting the annual 1:100 probable maximum loss as required by law. Staff is also authorized and directed to move forward to seek to replace expiring catastrophe bonds early using a replacement transaction as presented to the board by Gallagher representatives.

JM

## 2022 Property Cat Reinsurance Market Conditions Commentary as of May 17, 2022

- Competing market with traditional vs. ILS (Cat Bonds)
- Loss-free deals are viewed favorably, but still raced with rate increases

## An abundance of headwinds in 2022:

- Record cat losses in 2020 & 2021, a nend sin ce 2017
- Large buyers of Cat....buying more a June 1, 2022
- Inflation on loss trep
- Retrocession rate incleases
- All major reinsurers have reduced net PML in 2022
- Interest rates: risk free assets are now competing against risk assets

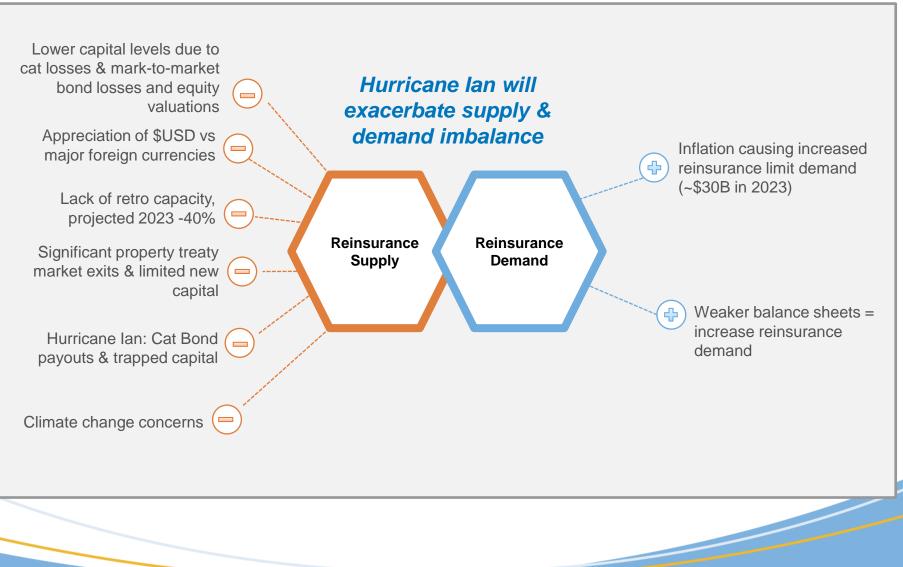

\* Projected on June 1, 2022, excluding Florida weighted programs

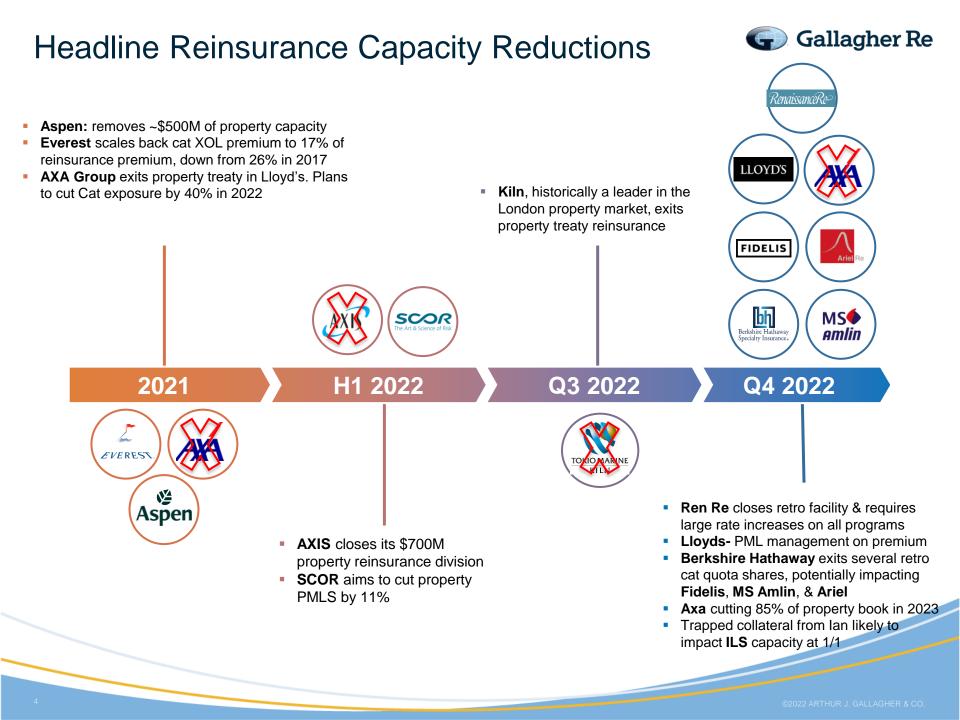

## **Property Reinsurance Market**

Historic Imbalance of Reinsurance Supply and Demand

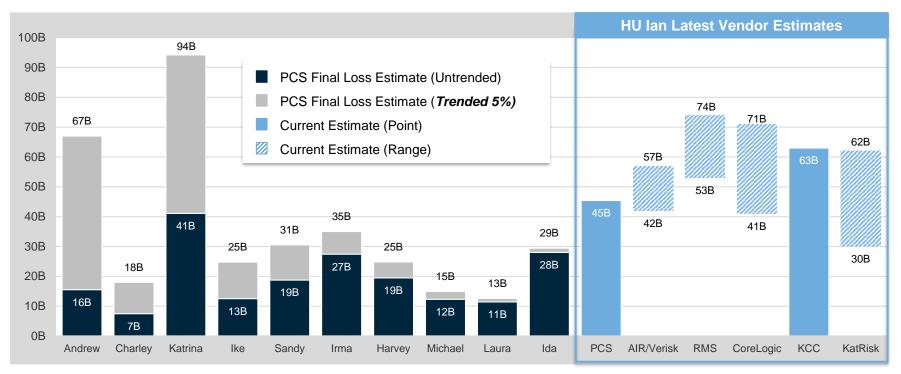

## Hurricane Ian

## **Historical Event Comparison and Latest Estimates**

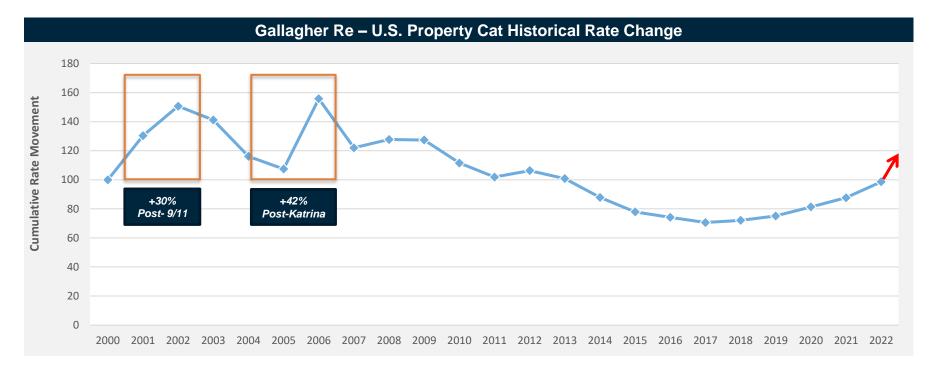

\*PCS loss estimate expected to develop over time by the time the claim is closed. Prior event development suggest potential for 20% growth in loss estimate.

- Based on latest vendor model estimates, Hurricane Ian may surpass the nominal (untrended) insured loss witnessed in all major hurricane events
- On a trended basis, lan expected to match the insured loss of Hurricane Andrew (FL 1992)
- Significant variability around vendor model loss estimates with uncertainty being driven by factors such as social and economic inflation and litigation costs

# U.S. Property Cat Historical Rate Change 2000 through "Early 1/1/23 Estimates"

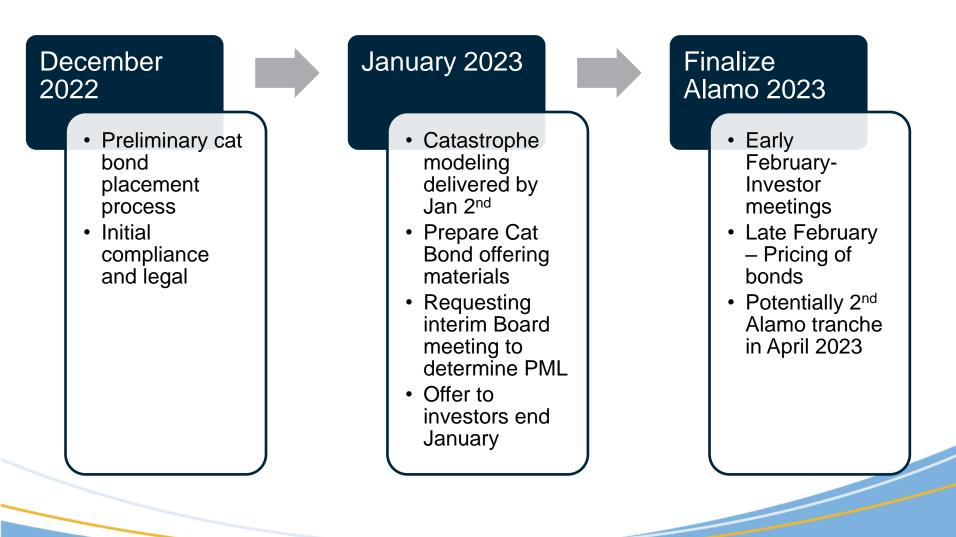

- Following Katrina and 9/11, rate movements varied between +30% and +42% in the year to follow
- Heading into 2023, pricing levels are now back to levels witnessed in 2011 with the expectation of further significant rate movement driven by supply demand imbalance and exacerbated by the impact of Hurricane Ian

## **Timeline- Action Items**

## **Market Conditions Warrant an Earlier Launch of Reinsurance Placement**

Note 1: The audit frequency has been modified to every 48 months due to the area's risk level and the fact the Model Audit Rule includes procedures that address this area annually.

# 8B. Internal Audit Risk Assessment

## Texas Windstorm Insurance Association Risk Assessment and Internal Audit Plan Update

December 13, 2022

# Risk Assessment Process Weav

- Purpose: The accompanying risk assessment has been completed for the purpose of developing an internal audit plan. This risk assessment, therefore, is not an enterprise wide risk assessment, which may consider other risk characteristics.
- ✓ Risk Assessments:
  - Are required by professional internal audit standards
  - Allow internal audit to focus its resources on the areas of greatest risk
  - Result in a comprehensive internal audit plan that identifies the specific areas of internal audit focus over a period of time
  - The frequency of internal audits performed is based on the over risk assessed, risk trends and other qualitative factors

# Risk Assessment Update Process

•

- Reviewed results of prior risk assessments as benchmark criteria for the update
  - Received input from the Executive Leadership Team
- Reviewed financial risks, process documentation, and strategic initiatives
- Considered industry best practices
- Evaluated inherent risk of probability and impact
- Considered current and anticipated business changes
- For key operating areas, evaluated financial/transaction significance and risk trends
- Considered the current control environment: staffing, policies, culture, anticipated changes in the environment
  - Assessed the degree of legal/regulatory compliance requirements
- Summarized risk ratings by business process area
- Developed internal audit plan for 2023, 2024 and 2025 to monitor and mitigate process risks

# **Risk Culture Observations**

Weaver observed the following organizational culture characteristics while developing the Risk Assessment and Audit Plan:

- Tone-at-the-top fosters strong control-focused culture
- Management thoughtfully discussed the risk assessments with Weaver for each business process area
- Policyholder communications the Association is proactive in outreach to Texas communities about coverage and protecting property from loss

Prior audits indicate internal control awareness and effectiveness:

- 2022 audits and internal control activities include: Reinsurance, Business Continuity of Operations, Depopulation, HR & Payroll, Claims, Follow-Up Procedures, Model Audit Rule
- Financial statements are audited annually by an independent CPA firm

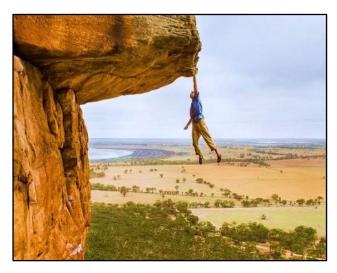

# **Risk Assessment Definitions**

#### Risks were evaluated based on inherent versus residual risk

**Inherent Risk:** The natural risk (exposure) in the significant activities of the organization **without consideration of internal controls** or other actions that mitigate risk.

**<u>Residual Risk:</u>** The risk that remains after controls are taken into account (the net risk or risk after controls).

Vs.

\*The Inherent Risk Assessment was used in developing the proposed areas of the internal audit plan. The plan is subject to review and approval of the Board.

## **Risk Assessment Results**

			2022	2 Risk /	Assessn	nent	Sun	nmai	ry			
		Inhere	ent Risk	Rating			Ri	isk Cc	atego	ory		
Risk Area	2020 2021 20		2022	Current Risk Trend <sup>1</sup>	Financial Stability	Operations	Legal & Compliance	Reputational	Fraud	Ш	Risk Trend <sup>1</sup>	
Reinsurance and Funding	<ul> <li>Execution of Agreements</li> <li>Billing and Recoverables</li> <li>Risk Transfer</li> <li>Reinsurer Credit Risk Monitoring</li> <li>Buying and Placement</li> </ul>	High	High	High	ſ	x	x		x			Risk is trending higher due to hardening market and probable decline in reinsurance capacity for catastrophic risks. As a result, reinsurance rates are expected to increase in 2023 and most likely beyond. This will also put additional pressure on loss/LAE ratios.
Information Security	<ul> <li>Mobile Security</li> <li>Logical Access</li> <li>(Database, OS, Application)</li> <li>Physical Access</li> <li>Cybersecurity</li> </ul>	High	High	High	1		x		x	x	x	Risk is trending higher due to the velocity and evolution of cyber threats. Threat has also increased due to remote working. TWIA is phasing out the Bring Your Own Device (BYOD) policy and rolling out TWIA-issued devices to mitigate risk.

This has created a very competitive retention landscape. This environment creates more retention challenges along with increased compensation cost. As TWIA has transitioned to a primarily remote working environment, the risk involved with training, onboarding and offboarding employees is increasing. Additional risk is also considered for the vacancy of the VP - Legal and Compliance and current staffing	

needs of the Accounting team.

Claims have a heavy dependency on system applications for processing. There may also be a dependency on third-party adjusters in the event of a named storm or hurricane, whereby these resources may not be available should more than one weather event occur in the Gulf or Atlantic seaboard. The recent impact of inflation and labor and material shortages have resulted in longer claims processing times and have increased the financial and legal risks. Overall risk remains high with a stable trend. Additionally, there has been an increase in suspected fraud referrals to TDI over the past two years.

During this time of transition and phasing-out of the Legacy system, TWIA will be using two separate systems. Risk will reduce once all claims have been transferred to the Elevate system. Risk is currently trending higher due to plans to replace the Payconnexion (Chase Bank) payment system in 2023.
Faciliti Servico	ies and es	<ul> <li>Building Access &amp; Physical Security</li> <li>Mail and Routing</li> <li>Facilities Maintenance</li> <li>Events/Training Management</li> <li>Premises Insurance (COVID)</li> </ul>	Moderate	Low	Moderate	$\leftrightarrow$		x					The overall risk level is moderate due to the upcoming office relocation. The risk trend is currently considered stable.

### **Risk Category Definitions**

#### Financial Stability Risks -

• The risk the Association will fail to adequately forecast and plan to achieve necessary cash flow, manage liquidity, receive adequate funding and accurately report financial results.

#### **Operations Risks –**

- The risk that internal operations do not adequately identify and provide for the needs of the Association's policyholders.
- The risk the Association's daily processes are not effectively designed to prevent and detect errors or adequately process claim volumes.
- The risk that the diverse nature of the Association's operations, processes, and/or underlying mechanics mitigate the economies of scale to efficiently execute transactions and processes.

#### Legal and Compliance Risks –

• The risk that legislative and political activities and decisions will have an adverse impact on the Association and inhibit its ability to achieve strategic objectives, or that regulatory changes impair operations and the ability to conduct business.

### **Risk Category Definitions Cont.**

#### Reputational Risks –

• The risk of an event generating poor public opinion and/or reduced employee commitment. Considers policyholder relations, agent relations, internal and external communications, data privacy, headline risk, etc.

#### Fraud Risks -

• The risk of the occurrence of illegal acts characterized by deceit, concealment, or violation of trust. Risks associated with dollar volume, non-conformance with ethical standards, and complexity of operations making detection more difficult.

#### Information Technology Risks -

• The risk the Association's IT strategy is not aligned with the business model to embrace and rely on technology. Also includes the risk the Association is highly dependent on technology to execute strategic operations and that IT infrastructure and systems are not consistently available and reliable.

# Audit Plan 2023-2025

- The proposed audit plan has been developed using results of the Risk Assessment and considered:
  - Risk trend
  - Results of past audits
  - Changes in the control environment
  - New software applications
  - Other qualitative factors

#### **Proposed Three Year Audit Plan**

**Note:** Model Audit Rule documentation will be updated and the annual risk assessment will be performed in 2023. Audit frequency is generally the following based on risk assessed: High 12-24 months; Moderate 24-36; Low 36-48.

(1) Process area is also addressed in Model Audit Rule testing, and therefore, audit frequency has been modified.

# Discussion

#### 8C. Continuity of Operations Review Results

#### Texas Windstorm Insurance Association Assessment of Continuity of Operations and Business Continuity Planning

#### December 13, 2022

### Continuity of Operations Plan (COOP) Assessment Objectives

- Determine whether the COOP aligns with industry and/or other practices over Business Continuity Management and verify the following elements are sufficiently incorporated into the COOP document:
  - Management support
  - Risk Assessment and Risk Mitigation
  - Business Impact Analysis
  - Business Recovery and Continuity Strategy
  - Plan Awareness and Training
  - Maintenance
  - Approval by Senior Management and/or the Board

The International Professional Practices Framework - Practice Guide Business Continuity Management (BCM) maintains that the tone at the top should be established by executive leadership and the board to include:

- 1. Board and senior management support the BCM initiatives
- 2. Senior executives should ensure successful implementation, maintenance, and update of plans supporting BCM
- 3. A BCM policy/charter should be in place and updated periodically
- 4. BCM-related plans, including BCP, should be approved by the board and appropriate levels of management

Governance of the COOP/BCP can be strengthened by:

- Developing a policy/charter that defines roles and responsibilities of the and Board
- Having the Board review and approve COOP/BCP on an annual basis
- Codifying the requirements for the roles and responsibilities of the ELT within the policy/charter
- Ensuring the policy/charter allows the ELT the ability to empower proxies as departmental representatives to work with the Senior Business Continuity and Catastrophe Plan Analyst during the annual update process
- Ensuring there are attestations received from ELT Members or empowered proxies on an annual basis stating that they have read and understand departmental BCPs

# Discussion

#### 9. Underwriting 9A. Weston and FedNat Update

TEXAS WINDSTORM INSURANCE ASSOCIATION

TWIA Response to Weston & FedNat (Maison) Insolvencies

# Summary of Weston Activity

- 12,089 total policies issued
  - 248 commercial
  - 11,841 residential
- Approximately \$4.5B in insured value and \$29.6M in written premium
- 3,205 policies on Weston Receivership Pay Plan

# Summary of FedNat (Maison) Activity

- 58 total policies issued all residential
  - We do not anticipate receiving any commercial policy applications from former FedNat (Maison) policyholders as the policy data we were provided did not appear to include any commercial policies.
- Approximately \$21.1M in insured value and \$131,600 in written premium
- 10 policies on FedNat Pay Plan

#### 9B. Operational Review Update

#### MEMORANDUM

DATE:	November 22, 2022
TO:	David Durden, General Manager
FROM:	Jessica Crass, Vice President, Underwriting
RE:	Update on Underwriting Operational Highlights

#### **Third Quarter 2022 Highlights**

- I. Service Results:
  - a. Underwriting met and exceeded its goals with consistent turnaround time on all transactions. Our goal is to issue 90% of new business submissions, endorsements, renewals, and cancellations within 10 days; we are surpassing this standard with over 98% of transactions processed within 10 days. Over 86% of applications/renewals were processed within 1 day.
  - b. Quality Assurance results on underwriting decisions continue to exceed established goals.
  - c. Telephone service response times for the quarter met expectations. Our standards include answering 80% of calls in under 20 seconds. Results were heavily impacted by a substantial increase in customer inquiries following the events related to Weston Property & Casualty Insurance Company's insolvency and liquidation proceedings in August, combined with the annual seasonal swell of business. However, our overall department results still exceeded our goal, at 81.6%.
  - d. Underwriting is operating below budget, in part due to open positions in the process of being filled.
- II. Agency Compliance Audits:
  - a. The TWIA Agent Auditor vacancy was filled in October. Standard audits were subsequently completed for a sample of agencies doing business with TWIA in the third quarter of 2022 to verify compliance with the declination of coverage and flood insurance requirements.

- i. Ninety percent of agencies have now completed their responses. Staff are pursuing a response from the remaining agencies and escalating issues as necessary.
- ii. Of the agencies who have responded, all policies reviewed were compliant with the requirement for proof of declination of coverage.
- iii. Two percent of the policies/properties selected for review required flood insurance and meet the requirement.
- iv. All agents audited have an active property and casualty insurance license.

### 9C. Depopulation

#### **Voluntary Market Depopulation Program**

Policies Bound Through Program, Month End November 2022

4,754

#### **Assumption Reinsurance Depopulation Program**

#### **Round 6: Status**

One carrier, SafePoint Insurance Company, submitted an application to participate in Round 6 of the Assumption Program prior to the October 1, 2021 deadline. SafePoint informed TWIA in February that Commissioner's Order 2022-7147 was issued January 4, 2022, approving SafePoint Insurance Company's participation.

SafePoint submitted its list of policies selected for offers through the program in March. The 31,959 proposed offers on unique policies were available for agents' review and selection through TWIA's policy administration system during the Agent Period of Round 6 from April 1 through May 31, 2022. As a result, agents approved 79 offers. Those policyholders will receive their offers after hurricane season in December, and they will have until January 31 to opt out and remain with TWIA. Otherwise, their transfer to SafePoint will be effective March 1, 2023.

#### **Voluntary Market Depopulation Program**

Four participating carriers have reported a total of 4,754 policies bound through the Voluntary Market Depopulation Program. Weston Insurance Company reported 2,506 policies bound before electing to discontinue its participation. State National Insurance Company, United Property and Casualty (UPC), and USAA Casualty Insurance Company also previously received approval to participate. UPC reported 71 policies bound before electing to discontinue participation, while State National and USAA reported 1,876 and 83 policies bound, respectively, before becoming inactive in the program.

USAA submitted an application to renew its participation in the Voluntary Market Depopulation Program to which was approved by TDI on December 1, 2021. USAA informed TWIA that they have resumed making offers through the program, and 218 approved offers were reported as of September 30, 2022.

# 11. TWIA Operations 11A. IT Systems Update

#### MEMORANDUM

DATE:November 23, 2022TO:David Durden, General ManagerFROM:Camron Malik, CIO / VP ITRE:TWIA Information Technology status

TWIA systems continue in production support mode with all systems stable. The items identified by the board based on agent comments have been addressed. The last item, printable quotes, is set to deploy in the first week of December.

The Infrastructure and Operations team continues to support remote work with excellent quality. All technology efforts are on-track.

We have a proposal from Guidewire, our insurance technology vendor, to move to a cloud-based implementation and we are in negotiations with them. The proposal and details are in the attached presentation.

# 11B. Proposal from Guidewire to Move Guidewire Insurance Systems to the Cloud

TEXAS WINDSTORM INSURANCE ASSOCIATION

Guidewire Cloud systems consideration

# Background

The recent upgrade of TWIA production systems to **Guidewire Version 9** provided new functional features, integrations and efficiencies.

TWIA agents are logging in to the new agent portal.

Policyholders are now able to set up an account in the policyholder portal.

A new enterprise data warehouse is supporting improved reporting.

# <section-header><section-header><section-header><section-header><section-header><section-header>

Engage Portals

Enterprise Data Warehouse **Guidewire Cloud Proposal** 

Move TWIA/TFPA to the Cloud if terms are favorable

- What is the cloud? What does it mean?
- What are the benefits?
- Why move to the cloud now?
- What is the financial view?

# **On-premises vs Cloud**

TWIA/TFPA are currently an **On-premises** implementation of the Guidewire applications. We buy software/hardware, build the applications and maintain/upgrade ourselves

Alternate approach is to use the **Cloud**. Lease and use based on need. Vendor develops features and maintains hardware/software. TWIA/TFPA is responsible only for our customizations

On-Premises (Buy)	Cloud (Lease)
Hardware, Guidewire Applications, Security, Performance/Capacity, Disaster Recovery and Upgrades are <b>TWIA/TFPA</b> responsibilities	Hardware, Guidewire applications, Security, Performance/Capacity, Disaster Recovery and Upgrades are <b>Guidewire's</b> responsibility
Hosted in TWIA/TFPA Data Center	Hosted at Guidewire Data Center (Amazon Web Service)
New features/capabilities are TWIA/TFPA responsibility	New features/capabilities are Guidewire's responsibility
Takes <b>TWIA/TFPA</b> 2-3 years to do an upgrade. Always playing catch-up	Upgrades done by <b>Guidewire</b>
TWIA/TFPA needs to upgrade hardware every 3-5 years	Guidewire responsible for hardware
<b>TWIA/TFPA</b> needs to integrate 3 <sup>rd</sup> party applications individually for our version	Access to 3 <sup>rd</sup> party applications integrated with Guidewire in <b>Guidewire Marketplace</b>

# Benefits of Cloud, What We Gain

- No major upgrades to perform in future such as TFPA implementation or Elevate
  - With move to Guidewire Cloud, we immediately get latest versions and new features
- Reduce On-Premises expenses (hardware, software, services, etc)
  - No need for hardware/software for Development and Quality Assurance (QA) systems
  - Non-Production Environments available on need basis in cloud for development and QA
- Get new features developed by Guidewire without investing our resources
  - Guidewire developing new features for cloud; not adding to on-premises version
  - With each cloud release, code base between on-premises and cloud will diverge. Future costs will increase
  - Access to 3<sup>rd</sup> party applications which have integrations with Guidewire Cloud, if needed
- Access to Guidewire features beneficial for business
  - Detailed property data using Hazard Hub tool
  - Predictive Analytics built into Policy and Claim systems
  - Visualize and click-through for map-based access to locations using Canvas
  - Claims Automation using Autopilot
- Guidewire shared responsibility model saves on standard IT responsibilities

## Guidewire Cloud: Responsibility Transfer and Sharing

# **Guidewire Cloud: Shared Responsibility Model**

On the Guidewire Cloud, customers will save (or avoid) on several standard IT responsibilities that are required for on-premises Guidewire systems.

	Self-ma	naged	Guidewire Cloud		
Item C	Customer	Guidewire	Customer	Guidewire	
Compliance Audits <sup>(1)</sup>

# Why move to cloud now?

#### • Allow us to lock-in cloud subscription fees at current prices

- Guidewire on-premises license fee increases in 2024 and beyond. Increase from \$2.9M (2023) to \$5.1M over 2024-2026 period with future increases possible
- Move to Guidewire cloud with current, favorable terms if we commit in 2022

#### • Opportunity to move at today's pricing with favorable terms

- Fixed price for implementation (contract in 2022 for implementation in 2024)
- Current pricing for Guidewire and terms locked for 7 years
- Systems (Development, Test) and helpful features (Hazard Hub) bundled in pricing with discount

#### Guidewire business model has moved to be a cloud vendor

- Guidewire developing features for Cloud, not adding to on-premises implementation
- Access to new features now without having to develop ourselves (e.g. Predictive analytics, Autopilot, etc)
- Other insurance companies have moved to Guidewire cloud or are actively in negotiations

# Cloud Terms from Guidewire with 2022 Commitment

Locked in subscription (baseline) at current pricing with 7-year term

**Fixed price** for Implementation and transition to the Cloud

Bundled pricing for Systems (Dev and Test) and Hazard Hub feature access (discounted) No budget impact for 2023. Zero net new spend.

- Locked in baseline Cloud Subscription at current pricing with 7-year term
- Fixed-fee Statement of Work is locked in 2022 with technical upgrade in 2023. No impact to TWIA
- Fixed fee Statement of Work for System Integrator locked in 2022. Inception and implementation to start in January 2024
- HazardHub Application Programming Interface (API) allocation increased from 25K (starter kit) to 500K API calls annually to account for our book of business (\$1/call -\$500K value)
- NPE (Non-Production Environments) credits of 3,500 credits annually (\$300/credit \$1,050,000 value for 3500 credits)
- First year of Guidewire Cloud at zero net new spend. No budget impact for 2023

• \*Guidewire Licensing reaches \$5,122,380 in 2027, currently does not increase.

# **Request to Board**

Seeking approval to commit to a locked-in price and contract with Guidewire for a Cloud implementation with a start date of January 2024 as described in this presentation

# 11C. Communications and Legislative Update

#### MEMORANDUM

DATE: November 28, 2022

TO: TWIA Board of Directors

FROM: David Durden, General Manager

RE: Communications & Legislative Affairs Operational Highlights

#### I. Legislative & Regulatory Affairs

a) <u>Changes to Coastal Delegation and Committees:</u> All members of the coastal delegation, the House Insurance Committee, and the Senate Business & Commerce Committee who ran for re-election won their contests in the midterm elections held on November 8.

Newly elected members of the coastal delegation are:

- i. <u>Senate District 11 (Galveston County)</u>: Rep. Mayes Middleton replaces retiring Sen. Larry Taylor.
- ii. <u>Senate District 27 (Cameron County):</u> Morgan LaMantia replaces retiring Sen. Eddie Lucio, Jr.
- iii. <u>House District 22 (Jefferson County)</u>: Retiring Rep. Joe Deshotel is replaced by his chief of staff, Christian "Manuel" Hayes.
- iv. <u>House District 23 (Galveston County)</u>: Former State Board of Education member Terri Leo Wilson replaces Rep. Mayes Middleton.
- v. <u>House District 37 (Cameron County):</u> Local school board member Janie Lopez replaces retiring Rep. Alex Dominguez.

Other coastal delegation changes include:

- i. Due to redistricting, Senate District 21, held by Sen. Judith Zaffirini, will no longer include any coastal counties.
- ii. Senate District 3, represented by Sen. Robert Nichols, will include part of Jefferson County and be included in the coastal delegation.
- b) <u>88<sup>th</sup> Legislative Session and Bill Filing</u>: The 88<sup>th</sup> Legislative Session will begin on January 10. Elected legislators began pre-filing bills for the session on November 14. Bills may continue to be filed until the 60<sup>th</sup> day of the session, March 10.

An exhibit tracking legislation filed to date with impacts on the Association is enclosed.

c) <u>Weston/FedNat:</u> TWIA conducted outreach to stakeholders in response to the insolvencies of Weston Insurance and FedNat (Maison) Insurance. Outreach included meetings with TDI and coastal legislators, email updates to agents, legislators, and coastal stakeholders, and website and

social media postings to ensure stakeholder awareness of the insolvencies and application and payment process changes authorized by TDI's emergency rule issued on August 23.

#### An exhibit listing the communications is enclosed.

d) <u>Legislative Engagement:</u> TWIA staff met with Senate Business & Commerce Committee (SBCC) staff to brief them on Association activities, including updates on the Weston/FedNat insolvencies. SBCC is chaired by Sen. Charles Schwertner (Williamson County). By law, he is also the Windstorm Insurance Legislative Oversight Board (WILOB) co-chair, the legislative committee tasked with studying TWIA's funding and a potential merger of TWIA and Texas FAIR Plan Association.

#### An exhibit listing Q3 2022 meetings with TDI and legislators is enclosed.

- e) Office of Public Insurance Counsel: Melissa Hamilton resigned from her position with the Office of Public Insurance Counsel (OPIC). The Texas legislature created OPIC to represent consumers' interests related to insurance matters. Deputy Public Counsel David Bolduc is serving as Acting Public Insurance Counsel following her departure. Mr. Bolduc previously served in TDI's Office of Policy Development Counsel, as an Assistant Texas Attorney General, and in the counsel's offices of two other state agencies.
- f) <u>Stakeholder Inquiries:</u> From July 1 through September 30, 2022, we received and responded to 29 legislative and eight coastal/industry stakeholder inquiries (seven from TDI and one from an Agent Advisory Group member).
- g) <u>Operational Updates</u>: We continue to provide regular email updates to the Board, the Texas Department of Insurance (TDI), legislative staff, and coastal elected officials and stakeholders about TWIA's operational activities.

#### II. Hurricane Preparedness & Coastal Outreach

- a) In Q3 2022, Strategic Communications' staff carried out various activities supporting our annual hurricane preparedness campaign, which ran from April through September and provided stakeholders with proactive measures to take before a storm.
  - i. Staff placed English and Spanish digital and print hurricane preparedness advertisements in several coastal publications, which ran from July to September.
  - ii. Staff also met with TDI's TWIA Ombudsman to share information about upcoming opportunities for participation in coastal outreach and education programs.
- b) Although Hurricane Ian did not impact the Texas coast, we used policy moratorium messaging as an opportunity to remind agents about when TWIA must stop issuing coverage due to storm events, the exemption of Weston applicants from policy moratoriums, and how agents can most quickly secure coverage for their clients before storm events.

#### III. Media Relations

- a) TWIA media outreach in Q3 2022 was similar to the same quarter in the previous year, driven mainly by Board and Committee activity related to rates. A notable additional topic of media outreach was the selection of a new TWIA General Manager.
- b) Media coverage for the quarter was primarily neutral. The volume of media coverage on rates was about the same as in Q3 2021. Legislators' concerns about cost increases drove negative coverage leading to the rate decision, with media coverage after the rate decision being primarily neutral. Media coverage of TWIA related to the Weston and FedNat insolvencies was nearly the same as the volume of coverage on rates. TWIA received additional coverage for the selection of a new General Manager and on the changes to the ABC endorsement factors.

#### IV. Agent Advisory Group

- a) The Agent Advisory Group (AAG) met on October 27 for their final meeting of 2022.
- b) At the meeting, staff reviewed the Association's leadership and organizational changes, our response to the Weston and FedNat (Maison) insolvencies, additional system updates related to ELEVATE, and the timing of changes to the ABC endorsement factors. Staff also updated the AAG on agenda items associated with TWIA Board and Committee meetings, including the Agent Commission Study, the evaluation of additional roof credits, and the 2022 Biennial Report.
  - i. TWIA staff provided continuous updates to the AAG via email about the closures of Weston and FedNat (Maison), including the potential number of impacted coastal property owners and the Association's efforts to assist former policyholders of both carriers with obtaining TWIA coverage.

#### **TWIA & TFPA Legislation Status** 88<sup>th</sup> Texas Legislature

Updated 11/28/2022

SB 230 Sen. Juan "Chuy" Hinojosa (Nueces County) Relating to the recusal from a vote of a member of the board of directors or a subcommittee of the board of the Texas Windstorm Insurance Association based on the member's financial interest.

TWIA Impact: Requires Board and Actuarial & Underwriting Committee members to recuse themselves from votes that may financially benefit their employer or an entity in which they have a financial interest.

Rep. Jacey Jetton (Fort Bend County) Filed 11/14/2022 HB 597 Relating to an appraisal procedure for disputed losses under certain property and casualty insurance policies.

**TFPA Impact** (*TWIA excluded*): Requires an appraisal process if demanded by either the insurer or insured and outlines appraisal procedures.

HB 601 Rep. Jacey Jetton (Fort Bend County) Filed 11/14/2022 *Relating to deceptive, unfair, or prohibited practices by an insurer.* 

**TFPA Impact** (*TWIA excluded*): Defines "compelling" a policyholder to retain a public adjuster by offering substantially less than the amount ultimately recovered in a settlement as an unfair claim settlement practice.

Other bills impacting Association operations on next page.

Status: Filed.

Status: Filed.

Status: Filed.

Filed 11/15/2022

#### **Other Bills Impacting Association Operations**

HB 287Rep. Julie Johnson (Dallas County)Filed 11/14/2022

Relating to payment of the replacement cost of damaged property under a homeowner's, renter's, or condominium owner's insurance policy.

**Association Impact:** Requires initial payment of at least 80 percent of a claim on replacement cost coverage property insurance policies regardless of whether the insured has made or provided proof of repairs or replacement to the property.

Status: Filed.

33	Net Operating Expense - UW Operations	34,060	33,711	348	33,961	99	33

#### **DISCUSSION NOTES**

**Decrease in Salaries & Wages** Retirement and resignation of employees during the latter part of the year.

Increase in Contractors This is due to the revised IT and Claims forecasts on TFPA allocations of contractors

#### **Decrease in Accounting Professional**

Services Attributed to the reduction of forecast in consulting services for the implementation and integration of Adaptive Budgeting & Financial Planning Software and apply portion of the charges in early 2023 budget.

Increase in Other Services Added budget for Escheat outsourcing services

Increase in Software Added software lease of Net Gain for Accounting department

Increase in Postage: Increased allocation of postage charges to TWIA due to anticipated increase in volume vs TFPA.

32	Allocation To Investing	(252)	(252)	0	32
33	Net Operating Expense - UW Operations	35,171	35,256	(85)	33

#### **DISCUSSION NOTES**

**Decrease in Salaries & Wages** Retirement of an employee in mid-January

Increase in Contractors Revised Claims allocations of contractors to TWIA and additional IT contractor in the 2023 budget

Increase in Accounting Professional Services Attributed to the continuance of consulting services for the implementation and integration of Adaptive Budgeting & Financial Planning Software in early 2023. This is related to the corresponding decrease in 2022 forecast.

Increase in Other Services Added budget for Escheat outsourcing services.

Increase in Software Added software lease of Net Gain for Accounting department.

Increase in Postage Increased allocation of postage charges to TWIA due to anticipated higher volume compared to TFPA.

Increase in Other Operating Expenses Added Office Supplies budget for IT
